

The Light Path
Lecture #7 of Year Two

The Light Beings Speak

I ask the divine light guide us and protect us. I call forth the beings of light and love, truth and wisdom. And I ask now that all that we need for the divine enfoldment of our souls, on all levels of our existence, manifest peacefully and lovingly.

Realize you don't look like what you look like to each other to those in other dimensions. To the light beings, you look like moving molecules of light. To sound beings, you look like sound waves and tone waves. To mental beings, you look like grid structures and designs. To energy beings, you look like fluctuating patterns of energy. To some beings who are ascended beings, you look like the totality of all your energies in molecule energy that reflects the greater molecules and grids of reality. The only time you look human is to other humans, for only humans have the perception that is designed in the human brain. That is one of your gifts so you all have a consistency of seeing each other. That's why anything that is in the Earth physical realm is perceived through this perceptual field by all that manifests in this realm.

Even in this realm, animals or mammals who have perception brains tend to see humans look all the same. Humans have a consistency of form to them, just as dolphins have a consistency of form to you. Dolphins don't look like that to dolphins. The way you see dolphins is not the way dolphins see each other. So, it is indeed in the eye of the beholder the way one is perceived. It's all in the eye of a perceptual gift. Let's put it that way. Trees see you looking a certain way, but trees to each other don't look the same as humans see trees. So to dolphins all humans look the same. It's true to humans, unless you've worked with dolphins, when you look at a dolphin, they obviously all look the same. To dolphins, each dolphin looks (clicking sound) different.

With cats and dogs, they don't see humans like humans see humans. All humans look the same to cats, and all humans look the same to dogs, but they have different tones and different light rays and different smells. That's how dogs and cats and most animals perceive humans: by their tones and by their light rays and smells. The form is not that important. With humans, humans to humans, form is really important. Form is as important to humans

as smell is to dogs, but this is only among humans. It is particular to humans, and that is why it is hard for humans to perceive that there are other levels of intelligence and other created beings, because they are so addicted to form as they perceive it. We are glad that each of you here is opening to understanding and receiving information and reflection perhaps that is beyond your perceptual field. It means that you are willing to see yourselves as part of a greater universe of created beings. Do you understand?

What we wish to talk about to you today is inviting in the idea that there are more beings now coming through the gateways of consciousness near the Earth plane. We have spoken about this before, how the entry levels for beings from other dimensions and other universes are opening. There are more and more beings from other dimensions able to come through the gates and perceive how to integrate and make their presence felt on the Earth plane. Some of you are feeling the presence of these entities around you more and more, and those of you who are doing this are also then teaching and guiding these entities how to relate to humans. It is like when humans relate to dolphins. Certain dolphins are sensitive to humans, and it is these dolphins that are teaching humans how to relate to other dolphins, right? So there are certain humans that are sensitive to what you call ET's, other beings, other conscious beings that are sharing this space. It is these humans that are teaching the ET's how to relate to humanity. Each of you present here in this group, or each of you listening to this lecture, have chosen as part of your life's work on the Earth plane to help entities who are not of the human species, or of the Earth family, to understand the Earth family. It is a demanding job, but it is quite wonderful if you can allow yourselves to enjoy it without getting upset, or scared, or frightened or take it on as too big a job. You are one among many who are helping this effort. Do you understand?

For a few of you, as you know there has been a lot of energy around you lately. There is a particular group of conscious entities. We hate to use these words, but they respond to the human perceptions, so we will speak even though it doesn't really explain the total situation. They've landed in your backyard, near the side of your house. They have created an energy field there. They have figured out recently that the being, who is friendly to them and can teach them things, lives in an energy form that they have to figure out how to get into. Of course that is your house, but to them, they don't know what a house is. They think your house is your body, and that you are the brain that runs the body. They don't understand that you and this big body aren't really connected in a way that you understand it. You'll have to teach them about doors.

They are from a galaxy beyond the known galaxies, far away in your terms, in your time. There are ways to travel through space and time that humans have no knowledge of. They've landed here because there is an energy pull. They are beings that roam around the galaxies and explore different realms of existence to take information back to their people that live in other areas. There's been an energy pull from your place because of you and your work, so they followed an energy pull. That's how they live. They followed energy. They are not Earth beings. They've landed in the energy vortex that's on your land. They have recently opened their energy vortex and are trying to get a scan of what's going on. It's hard to describe what's going on and keep the integrity of them and describe it in Earth terms, so have patience with us, please. They are scanning the energy field at the pull, and they have come to this conclusion that there is a very dense, slow energy field that must be your body, which we will say is your house. They are trying to find the pathway in to find the conscious entity that lives in this energy field, and they have found you. They have followed a light way through the molecules of your house, and they think they have found the conscious entity that builds this body. Now they have been scanning you lately, trying to figure out your patterns of existence.

You can spend time each day sending images of what they will understand. They function on energy patterns, so you can think of what energy pattern of the Earth plane do you want them to understand: love, creativity, passion - you know what is it. Then hold the energy pattern in your heart and in your mind and with your breath, send it out through the walls of your house, to the energy vortex where it is, so that they can get it. They get thought patterns, and they will get it that way. If you go outside, that will help, indeed. Then that will confuse them, but it will be good because they will understand that you and your big body do not always have to be together. They will perceive you as an energy that separates from the dense form and then merges back with it, very interesting human existence. Houses or buildings are very intriguing to many -- let's just use the word-- ET's, just for want of a better word. ET's are trying to figure out what are these bodies that people come in and out of. People have other bodies they get in and move around in, and they have other bodies that swoosh up against other bodies, you know, sex.

Imagine that you come from a universe or a creative place that either functions on energy forms or just pure light, or highly moving molecules, that doesn't have any dense form, trying to figure out Earth. It's like humans going down to the very bottom of the ocean trying to figure out how the creatures live there without light. You know, it's a mystery. You

are a mystery. Everyone here is a mystery to most ET's. They are not here to hurt, control and manipulate. They are exploring, looking at what is at the bottom of the universe.

Some of you are curious about reports by humans saying that they were experimented on and taken against their will by alien beings. What is behind those stories? Most humans that say they have been abducted are not taken against their will. They have agreed to do it at some point, but their egos don't remember, so it is against the will of the ego.

You are aware of a movie called "Close Encounters of the Third Kind". That was pretty accurate, it was a true story. That's why it is so powerful, yes, very powerful. You know there were some add-on's, but the core of it was true, like when they meet each other and there is that vibration. When you sense there are other entities around you, just try to feel if they are radiating a certain energy or are they giving off certain forms. Do you see them in a form, are they giving a certain sound? Are they sound beings. You might see them, like they flick in and out like when you think somebody walked by and you look and there is nothing there. You sense a feeling, or a movement, or an energy, and you look and there is nothing there.

As we were saying, you know the best analogy is humans going down to the very bottom of the oceans. You know how humans put ships on and go way, way down. They are exploring life forms that humans have no knowledge of yet. They do not have any understanding about it, but they want to know what is at the very bottom of their created world. Well, Earth is like the bottom of the universe. Earth, Mars, Venus, this whole solar system, is like at the bottom of the ocean so most of the ET's that are coming are wondering what's down there, if you want to use an Earth word, what's there in that slower, sludgy, low light place. What's there and how is what's there related to us? That is the question that you have about ET's, where are they in the higher realms and how are they related to us. Well, it's a reverse question for most ET's. Do you understand?

The more that you can come forth in your images and in your words, in your keeping the grid of human thought in projecting feelings, the more you can teach them, the less intrusive they will be, because they will then come to understand that form to humans is sacred. Your form is sacred to you, is it not? There is nothing wrong with that. Your body, your feelings, your homes, where you live is sacred because you have been created to cherish form. That is why the higher beings have had to come down in form to teach you. The ET's need to learn that, just as they come from a full color vibrational universe, that vibration is sacred to them. Humans need to learn what is sacred to them, and they need to learn what is sacred to you.

When you feel them around, say hello. Try to sense what kind of energy they have. Do they have a pure energy scan? Do they have a form themselves? It might look like a different form. It might look like a very tall, pulsating light form or a sacred geometry form or a bouncing energy electrical form, whatever they have. They are pulled to you by an energy pull. You can follow that in reverse. Breathe into your body, close your eyes and just feel where the energy is pulling you to move and go where the energy is pulling you. Do you understand? Sit there and then project to them and teach them.
